Q3.

What is meant by being 'Social Beings'?

Answer:

Humans are called **social beings** because they live together, depend on one another, and interact within society.

Q4.

Name the four major pillars of Social Science.

- **History** – Studies past events, people, and how they shape the present.

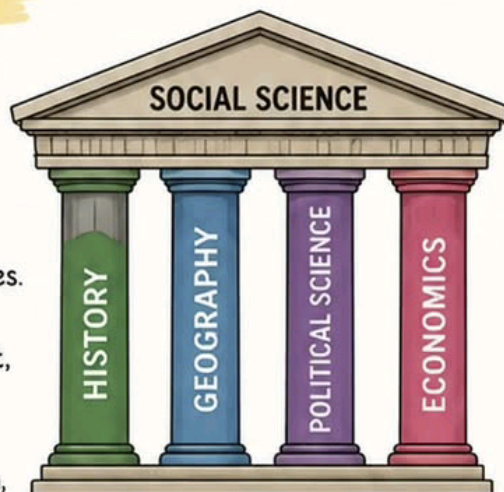

- **Geography** – Studies the Earth, its features, environment, and human activities.

- **Political Science** – Studies government, laws, rights, duties, and citizenship.

- **Economics** – Studies resources, production, distribution, and consumption of goods and services.

Q7.

What is the aim of Political Science?

Answer:

Political Science studies government, democracy, laws, rights, duties, and citizenship.

Q8.

Why are resources important in an economy?

Answer:

Resources help

- produce goods and services to meet our needs.
- create jobs and provide livelihood.
- support economic development and improve living standards.
- promote balanced growth and reduce poverty.

NATURAL RESOURCES

Land, water, forests, minerals, soil, sunlight etc.

CAPITAL RESOURCES

Tools, machines, buildings, roads, vehicles, money etc.

HUMAN RESOURCES

People and their skills, knowledge, health and experience.

ENTREPRENEURIAL RESOURCES

Ideas, innovation, risk-taking and business skills.

RESOURCES
The foundation of an Economy

When resources are used wisely and equally, they lead to a strong and developed economy.

Q9.

Where does 'Unity in Diversity' originate?

Answer:

It comes from India's rich **cultural**, **linguistic**, **religious**, and **regional** diversity while remaining united as **one nation**.

Different yet together,
diverse yet united — that is **India**!

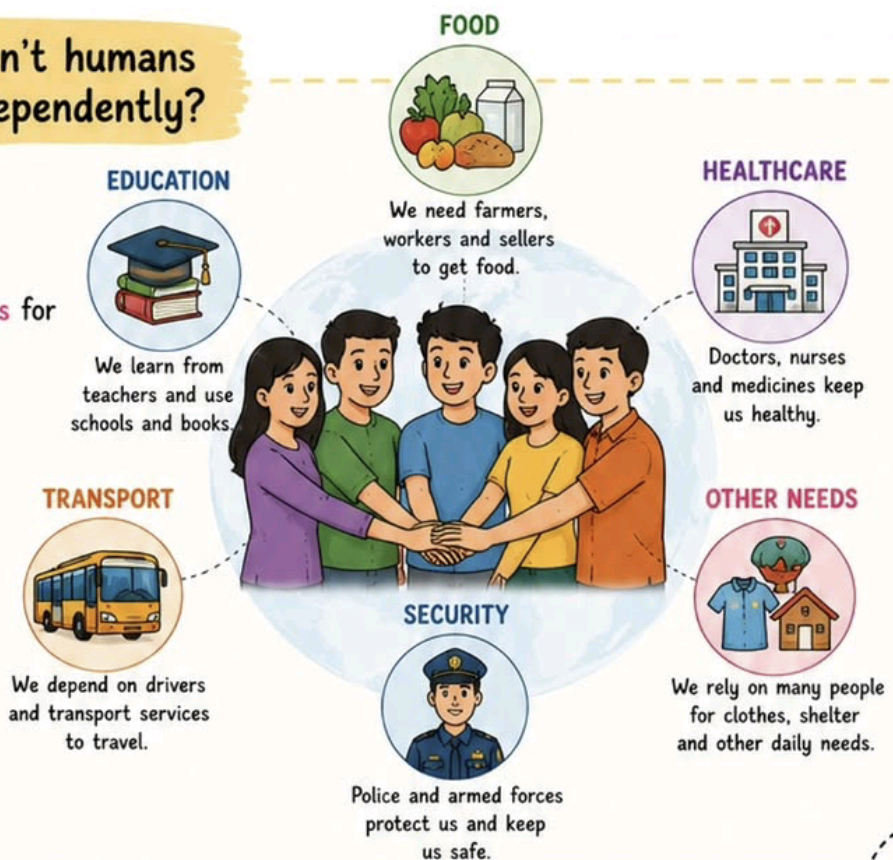

Q10.

Why can't humans live independently?

Answer:

Humans **depend on others** for many needs in daily life.

We grow, learn,
work and live
better together.
Society makes
life possible!

LONG ANSWER QUESTIONS (11-13)

11.

Explain how Social Science is connected with daily life.

Answer:

- Helps us understand society.
- Teaches responsible citizenship.
- Explains history and culture.
- Protects the environment.
- Improves decision-making.

Understand society

Responsible citizenship

History and culture

Protect the environment

Improve decision-making

12.

Geography helps us understand...

Answer:

Climate, landforms, resources, disasters, and human-environment interaction.

Climate

Landforms

Resources

Disasters

Human-environment interaction

13.

History connects...

Answer:

The past with the present by explaining historical events and their impact.

PAST

Historical events and people

CONNECTION

Helps us understand changes and continuity

PRESENT

Improves our understanding of today's world

LONG ANSWER QUESTIONS (14-16)

14.

What are the roles of citizens and government?

CITIZENS

● Follow laws

● Vote

● Pay taxes

● Respect others

GOVERNMENT

● Maintain law and order

● Provide public services

● Protect rights

● Promote development

★ Citizens and the government together build a strong, just and developed nation.

15.

Why is Social Science beyond exams?

Answer:

Social Science is **not** just about marks; it prepares us for **life**.

DEVELOPS CRITICAL THINKING

Helps us analyse problems and make better decisions.

BUILDS AWARENESS

Makes us aware of society, environment and current issues.

ENCOURAGES LEADERSHIP

Inspires us to take initiatives and lead positive change.

IMPROVES LIFE SKILLS

Helps in communication, teamwork and responsibility.

16.

Why should we study from an Indian perspective?

Answer:

Studying Social Science from an **Indian perspective** helps us understand our country better.

UNDERSTAND INDIA'S DIVERSITY

India is diverse in culture, language, religion and regions.

APPRECIATE OUR DEMOCRACY

Helps us value our democratic system and citizen participation.

KNOW OUR CONSTITUTION

Helps us understand our rights, duties and the rule of law.

VALUE OUR CULTURE & HERITAGE

Helps us respect our traditions and preserve our rich heritage.

HOTS QUESTIONS (17-19)

17. If Social Science didn't exist, what challenges would society face?

Answer:

If Social Science didn't exist, society would lack **awareness**, **responsible citizens**, and **understanding of history**, **government**, and the **economy**.

WITHOUT SOCIAL SCIENCE

LACK OF AWARENESS

People remain uninformed and misguided.

IRRESPONSIBLE CITIZENS

People may not respect rules, rights and duties.

IGNORANCE OF HISTORY

We forget our past and lose important lessons.

POOR GOVERNANCE & WEAK ECONOMY

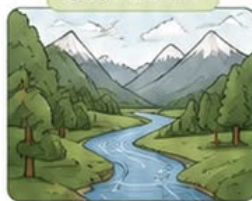

Leads to confusion, inequality and slow development.

18. Give an example showing how different branches of Social Science are interlinked.

Answer:

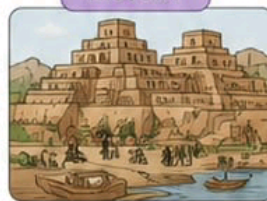

A river (Geography) supported an ancient civilization (History), which later influenced governance (Political Science).

GEOGRAPHY

A river provided water, fertile soil, transport and resources.

HISTORY

These resources supported an ancient civilization to grow and prosper.

POLITICAL SCIENCE

The civilization developed systems of governance, laws and administration.

★ This shows how **Geography**, **History** and **Political Science** are interlinked.

19. What is the role of Social Science in promoting sustainable development?

Answer:

Social Science promotes sustainable development by helping us understand **society**, **resources** and **responsibilities**.

ROLE IN SUSTAINABLE DEVELOPMENT

ENVIRONMENTAL CONSERVATION

Encourages protection of nature and biodiversity.

SOCIAL EQUALITY

Promotes justice, inclusion and equal opportunities for all.

RESPONSIBLE RESOURCE USE

Teaches wise and fair use of resources for present and future.

BALANCED DEVELOPMENT

Supports economic growth without harming people or nature.

★ Social Science helps us build a **better society** today and a **sustainable future** tomorrow.

HOTS QUESTION (20) 🔥

20.

Do you think Social Science will become more important in the future? Why or why not?

Answer:

Yes, Social Science will become more important in the future because it helps people understand and deal with complex and global challenges.

WHY SOCIAL SCIENCE IS IMPORTANT FOR THE FUTURE

UNDERSTANDS GLOBAL ISSUES

Helps us understand problems like poverty, inequality, war, migration and human rights.

STRENGTHENS DEMOCRACY

Encourages active citizenship, participation and respect for laws and rights.

ADAPTS TO TECHNOLOGY

Helps us understand the impact of technology on society, jobs, privacy and ethics.

ADDRESSES ENVIRONMENTAL CHALLENGES

Promotes awareness about climate change, conservation and sustainable living.

SUPPORTS SUSTAINABLE DEVELOPMENT

Helps in balanced economic growth, resource use and social justice.

Social Science prepares us to build a **just, peaceful, inclusive** and **sustainable** world for the future.
